

Sandy Chian

Topic: ‘Electrospun biomaterials for tissue engineering’

Prof Dr Sandy Chian is Associate Professor at the Nanyang Technological University School of Mechanical & Aerospace Engineering / Division of Manufacturing Engineering. He completed his PhD at the University of Manchester Institute of Science & Technology, UK. His research focuses on Tissue Engineering; Biomaterials; Polymer Synthesis and Modifications; Scaffold Fabrications Technology; Bioreactor Design. Currently he has collaborative project with A/P Walter Hunziker (IMCB) in the tissue engineering of the esophagus.
